Deep Blue-Purple.....TOP HAT

Light Blue.....ELEANOR BLUE

Clear Deep Blue.....BLUE DANUBE

Bright Orange.....VALENCIA

Deepest Cream.....ORIENTAL

Pure White.....HOPE

All 10c per packet; 50c per ounce

## SUGGESTIONS FOR GROWING

---

---

1. Select a sunny, wind-sheltered situation.
2. Dig out a trench at least 1 foot wide and 1½ feet deep.
3. Plenty of humus in the bottom of the trench is advisable—peat moss, leaves, grass clippings, and bean straw are all good. Cow manure tends to cause damping-off and fungus, but may be used.
4. Fill in the soil, mixing the Campbell's Sweet Pea Food with it. This contains all the soil-essentials for sweet peas, including nitrogen, phosphorus, potash, lime, soil-sulphur, iron oxide, etc.
5. Soak the trench thoroughly. After two or three days, cultivate the surface. You may now plant at once, although additional soakings and surface cultivations are beneficial before planting.
6. Plant the seeds about 2 inches deep and 1 inch apart. DO NOT soak the seeds. The seeds may be rolled in Nitragin bacterial culture, slightly moistened, for additional vigor of roots and vines.
7. It is better not to sprinkle the row unless the weather is extremely hot. Watering is best done by furrow, after the sprouts have shown.
8. For a continuance of large flowers and long stems, fertilize in the irrigation-trench every few weeks next spring with more Sweet Pea Food, Vigoro, or liquid cow manure.

## LONGER STEMS, LARGER FLOWERS

— when you use this  
complete plant food

● Really gorgeous sweet peas  
and other flowers can be grown  
only on a *complete* diet.

Nitrogen, calcium, iron, magnesium and others—11 food elements all told—must come from the soil. Lack of even one will hurt your flowers.

Play safe—feed VIGORO, the plant food that supplies *all* 11 vital elements in correct proportions. Vigoro builds disease resistance, insures early and prolific blossoming. Sanitary, odorless, safer and easier than ever to apply. Order Vigoro now, at new low prices!

Made in California and Oregon  
especially for western soils

A SQUARE MEAL FOR EVERYTHING YOU GROW

# PLANTING BULBS?

## Give them a square meal

- Don't risk your investment in bulbs —protect it as commercial growers do, by feeding VIGORO.

Bulbs, like other growing things, need 11 different food elements from the soil; lack of even one of these vital elements imperils your bulbs' health.

Vigoro, supplying *all 11* in balanced proportions, assures the necessary fall root growth, guarantees a strong start and early flowering in the spring. It's sanitary, odorless, safe and easy to apply. Feed your bulbs *now*—order Vigoro at new **LOW PRICES!**
